Weekly Cloud Infrastructure & Operations Report

Report ID: OPS-2026-0709
Environment: Production
Region: ap-south-1
Generated: Monday • 09:00 UTC

Hello Akshat,

Your automated weekly infrastructure report is ready. This report summarizes the operational health of your AWS environment, highlights security observations, identifies potential cost savings, and provides recommendations for maintaining a reliable cloud infrastructure.

Executive Summary

- ✔ Infrastructure Availability: **99.98%**
- ✔ Production Services: **Operational**
- ✔ Automated Backups: **Completed Successfully**
- ✔ CloudFront CDN Performance: **Healthy**
- ⚠ IAM Security Review: **1 Action Recommended**
- 💰 Estimated Monthly Cost Savings Opportunity: **\$43**

AWS Service Health

AWS Service	Status	Last Checked
Amazon EC2	Healthy	08:00 UTC
AWS Lambda	Operational	08:02 UTC
Amazon S3	99.99% Available	08:01 UTC
Amazon RDS	Backup Completed	07:45 UTC
Amazon CloudFront	Global Delivery Active	08:03 UTC
IAM Security Review	Review Required	Weekly

Priority Security Recommendations

- Review inactive IAM users and remove accounts that are no longer required.
- Rotate access keys older than **90 days** to follow AWS security best practices.
- Enable Multi-Factor Authentication (MFA) for all privileged IAM users.
- Review administrator policies and enforce the Principle of Least Privilege.
- Enable AWS Config rules to continuously monitor compliance.

Security Score: 92 / 100

No critical vulnerabilities detected. One medium-priority IAM recommendation requires administrator review.

Cost Optimization Summary

- Move infrequently accessed Amazon S3 objects to Glacier Instant Retrieval.
- Delete unused EBS snapshots created over 90 days ago.
- Review idle Elastic IP addresses attached to stopped instances.
- Rightsize underutilized EC2 instances based on CloudWatch metrics.
- Review Lambda functions with low invocation frequency.

Estimated Monthly Savings

≈ \$43.20

Potential savings identified across storage and compute resources.

 Report Information

Generated By	CloudNova Serverless Notification Platform
Cloud Provider	Amazon Web Services
Infrastructure Region	ap-south-1
Environment	Production
Report Generated	Monday • 09:00 UTC
Reference ID	OPS-2026-0709

This report has been automatically generated by the **CloudNova Serverless Notification Platform**. The reporting workflow is powered by AWS serverless services and is scheduled to execute every Monday morning to provide infrastructure visibility, operational insights, and security recommendations to the Cloud Operations team.

Thank you,

Cloud Operations Team
